## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, drawn to a method of making carbon nanoparticles, classified in class 423, subclass 447.1.
  - II. Claims 6-17, drawn to an apparatus, classified in class 422, subclass 186.21.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as apparatus and method of making. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus can be used for a different process or (2) that the process as claimed can be carried out by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus could be used as a hydrogenation reactor. The intended use of the apparatus is not considered when considering a restriction. In its broadest interpretation, the apparatus could be used for another process as stated above.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1754

4. A telephone call was made to Dmitri Koulikov on 12/13/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
